

FIVE CENTS

MILLER & CO.

Corner Rosser Avenue and 9th St.

Brandon.

THE JEWELER'S STORY.

I asked Mr. Jeweler, "What is the most valuable thing in your safe?"

"The safe itself," he replied. "It is the most valuable thing in my life."

"Why is that?" I asked.

"Because it is the only thing that I can trust to keep my valuables safe," he replied. "It is the only thing that I can trust to keep my valuables safe."

"What is the most valuable thing in your safe?" I asked.

"The safe itself," he replied. "It is the most valuable thing in my life."

"Why is that?" I asked.

"Because it is the only thing that I can trust to keep my valuables safe," he replied. "It is the only thing that I can trust to keep my valuables safe."

IMPENETRABLE SAFES.

Massive Resistant to the Keenest of Precious Jewels.

Solid Walls of Steel That the Most Skillful Burglar Could Not Penetrate in a Short Time.

Here are 20 feet of showcases, half of them on one side of a long room, and half of them on the other. They are made of solid steel, and are impenetrable to the keenest of thieves. They are made of solid steel, and are impenetrable to the keenest of thieves. They are made of solid steel, and are impenetrable to the keenest of thieves.

"What a beautiful field for a burglar!" was the first thought that flashed through the mind of a burglar who entered the place a few days ago. Not that he was disappointed in the field, but in the fact that the safe was so strong.

"What do you do with your goods at night?" the reporter asked the proprietor.

"I don't find it easier to get them in the daytime," Mr. Jeweler smilingly responded.

"But you have some system of securing them. Tell me what it is for the information of the public—if it is not a secret."

"There is no secret about it," the jeweler replied. "Do you see those three cabinets, those black walnut cabinets, against the east wall? We put everything in them at night."

"You trust to a black walnut cupboard all these cases of gold and diamonds, do you, valued at—about how much?"

"If you take the entire lot," Mr. Jeweler laughed, "you can have it for \$350,000. But come behind the counter with me and let me show you the cabinets."

The jeweler led the way to the middle of the east side of the room, between cases full of diamonds and costly stones on the one hand and upright cases full of silver teapots and trays and sugar bowls on the other hand.

"Here," he said, when the cabinets were reached, "is where we keep everything at night, except such large articles as we do not get in. In our business it is not the big things, but the little ones that are valuable."

"They were ordinary looking walnut cabinets, each perhaps seven feet high and five feet wide, and each with folding doors, an upper and a lower panel in each door. A boy might break them all open with a hammer in one minute."

But Mr. Jeweler threw open one of the pairs of folding doors and disclosed inside an immense safe that seemed to say: "Come on, now, if you're a burglar, let's see what you can do!" It was one of the polished steel sort, with tremendous resistance written all over it.

"These are called burglar-proof safes," said the jeweler, "but I need not tell you that no safe is burglar proof. Nothing has been or can be made that cannot be broken, and an expert burglar can open any safe in the world. However, I think these are as nearly burglar proof as any safe in New York. It is merely a question of time with a burglar, and these safes are warranted to resist any attack, except with explosives, for twelve hours. There is not much danger from gunpowder or dynamite in such an exposed place and to operate with tools successfully requires twelve hours."

As he spoke he opened the safe doors. Three-fourths of the interior was divided into shelves, all of the same height and breadth. The other fourth was taken up by another safe, apparently complete in itself.

"There is where we keep our most valuable goods, the diamonds and other very costly articles," the jeweler continued, tapping the small inner safe. "These are of the same make as each of the large safes, and each has its own separate combination. If a burglar manages to reach the inside of one of the large safes, he still has the other safe to open before he can get the most valuable goods."

"But what an immense labor it must be to put all those goods in the safes every night and take them out again every morning," the reporter suggested.

every morning," the reporter suggested.

"Not as much as you might think," Mr. Jeweler replied. "I will show you how it is done. Look at the show-case. You see the articles do not lie on the bottom of the case, but on little shallow velvet-lined trays. These trays are made to fit the showcase, three of them being just the width of the case. The compartments in the safes are made to accommodate the trays, each compartment holding two tiers of six trays each. To insure closing we have only to slide the trays into the safes, and everything is secured."

"That is very convenient," the reporter acknowledged, "and it seems to be very secure."

"Ah, but that is only the first step toward security," the jeweler explained. "We do not put all our money on one case. You have seen that the safes are as strong as they can be made. That is all that steel can do for us. Now we call in electricity to stand guard. Each safe is connected by separate wires with the Burglar Alarm Company. If an explosion or any other jar should move one of them a six-inch bell rings out of the place, a bell which rings on the headquarters of that company, and within ninety seconds two police men would be here. If anybody should turn the combination knob a half a breadth that would have the same effect. I need to have the wires run into my sleeping-room, but I found that two or three times a year there would be some trouble with crossing wires, and I would be called out in a hurry in the middle of the night, and it gave me too much worry. So I had the wires connected with the Burglar Alarm Company, and now when I go home I do not give the goods another thought."

Mr. Jeweler have closed the safe doors and turned the little knob that locks them.

"We can lock or unlock them a hundred times a day," he continued, "but when we once lock them for the night they are not opened again till next morning. When I set the combination for the night, just before going home, I give an electric signal to the burglar alarm people, and that instant the alarm is set. If I should forget anything, and should I open the safe myself after giving the signal, there would be two police men here in a minute, and a half, exactly the same as though a burglar were at work. Now do you suppose I can go home with an easy mind?"

"Perfectly," the reporter assented; "your goods are certainly safe."

"But that is only the second step toward security," Mr. Jeweler said. "Let me show you the third."

He closed the folding doors of the walnut cabinet.

"Tap one of those panels with your fingers, please," he said.

The sound that followed was muffled and heavy, entirely unlike the sound made by tapping a thin wood panel.

"These slight cabinets are not as defenseless as they look," the jeweler continued, "and other parts of the cabinet, although of wood on the outside, have pasteboard within."

"And why pasteboard?" the reporter asked.

"Because pasteboard is a better non-conductor than wood. The panel you tapped is made of three thicknesses of pasteboard and two thicknesses of tin foil. If there is any other pasteboard cabinet, which is installed and installed in a wall, then a layer of tin foil; then a second sheet of pasteboard; then a second layer of the foil; and finally a third sheet of pasteboard, which forms the back of the panel. The first sheet of the foil is connected with the positive pole of an electric battery, the second sheet of the foil is connected with the negative pole of a battery. With the sheet of pasteboard between them the metallic sheet do not touch, and there is no circuit. But let a burglar begin to operate upon the cabinet, and run a knife or a gimlet or anything else through the panel, and the metallic tool, touching both sheets of the foil, instantly completes the circuit, a bell rings in the burglar alarm office, and two police men come, as before."

"Is that all?" the reporter asked.

"No, not quite," Mr. Jeweler smilingly replied. "Besides these little appliances we have a faithful watchman in the store all night. Part of his work is to press a little electric button every half hour from the time we lock the front door at night till we open it in the morning. Thoroughly he tells the burglar alarm people that he is awake and on duty. If he lets sixty seconds beyond the half hour pass without pressing the button, the two police men come to see what is the matter, just as if somebody had tampered with the safes."

"There were no more precautions, and the jeweler and the reporter emerged from the inner regions of gold and precious stones.

"Thank you very much," said the reporter.

"Goodday," said the jeweler. "Come again; but always come in the daytime."—N. Y. Sun.

Stub Ends of Thought.

Molasses is honey to the contented man.

Don't rub a woman the wrong way of the fur.

Even a sheepskin isn't a yard wide and all wool.

Some men are grasping enough to want to subdivide the clay they are made of and sell it for town lots.

Discontent is the peg in your shoe that hurts.

A woman's smile is the little poem we find in the prose of life.

We never read a novel that we don't liken ourselves to someone of the characters.

The man who forgets himself in his sacrifices for others is not as great as he who makes the sacrifices remembering himself.

A million dollars covereth a multitude of sins.

Marrying for money has its drawbacks.—Detroit Free Press.

Piled Piled Lining Piles.

Symptoms: Moderate, intense itching and stinging most at night, worse by scratching, itching to continue from force, which often leads to ulceration, itching very sore, swollen, inflamed, itchy, and in most cases causes hemorrhoids. Attracted to by mail for 50 cents. Dr. Swaine & Son, Philadelphia. Lyman, Sons & Co., Montreal. Wholesale & Retail.

& MORTON

OAK LAKE.

When we got to Oak Lake a few days ago we were surprised to find that the town had grown so much. When we passed through the place before, we noticed that there were very few buildings on the south side of the railway track, but now it is filling up rapidly. Mr. Allen McQuarrie has a lovely, level, and well-kept 40,000 ft. and he is doing a big business in building lots of the cottages which are situated by the water. Mr. Thomas Reynolds and Messrs. Powell and McMillan also Mr. Thompson is making a fine effort in connection with the hotel. Dr. McMillan, the Vet., is kept very busy because he has no competition. He is young and energetic, and successful in his practice.

REPAIRS, POWELL & McMILLAN

have their stable located in the central part of the town on the main street and are conducting a thriving business. At these stables we were glad to meet our old friend Mr. Henry Powell, late of New York City. He is delighted with the country.

HOUSES.

When we reached the town we took a look at the first hotel in sight, which was owned by Mr. Thompson, but in our opinion was not a very good one. There were no improvements there, and it was not a very good one. We found a very good one at the corner of the main street and the railway track. This house is well built, and it is a very good one. It is a very good one. It is a very good one.

THE PROPERTY.

There is a very good one at the corner of the main street and the railway track. This house is well built, and it is a very good one. It is a very good one. It is a very good one.

Raymond & Houston,	13.50
1. Callender,	10.75
2. G. Patterson,	10.75
3. M. L. Smith,	6.00
4. F. Pope,	4,000.00
Adopted.	

Committee reported having inspected city and goods warehouse work, found it satisfactory and would recommend the payment of Mr. Danvers's claim in full.

At a late hour a discussion took place between Ald. McGregor, chairman of the committee and Ald. Caldwell, who must have been the work was not being done as fast as it should be. The report of the committee was not being done as fast as it should be. The report of the committee was not being done as fast as it should be.

At the resignation of J. R. Foster, a new one was appointed.

That committee was for application for a license of a full office, application was made by the 21st of March.

Report adopted.

Committee went into committee of the whole. Ald. Caldwell in the chair, for the purpose of meeting Mr. Pope and if possible to come to some terms, and take the final of his house.

The committee felt before them the estimate of the architect and certain of the work was not being done as fast as it should be. The report of the committee was not being done as fast as it should be. The report of the committee was not being done as fast as it should be.

The list of expenses was gone through item by item. The whole amount to \$658.00 of this was set aside for \$113.15, leaving the balance of one of the items.

After some little discussion it was decided to take the estimate of Mr. Pope, and by withholding \$500 and some other of the items of the bill would be the same as the balance of the bill, which was the amount of the bill was \$113.15.

Mr. Pope was agreeable.

The committee then rose and reported to the council. The report was adopted.

RHEUMATISM CURED

MR. BERMAN,

Who comes from Russia can and will cure Rheumatism, which was his business in Russia. If he fails to cure you, he will charge you nothing. It does not make any difference where it is. To the back, arms, legs, or any other part of the body, if you have weak limbs, he can also cure that.

He stops at A. Berkman's, 8th St., north of Dr. Fleming's drug store, Brandon, Box 312.

If you wish to write for information, it will be promptly attended to.

Brandon, Jan 7 1892-3m
